PROFESSIONAL SUMMARY

Database Administrator with 2.5+ years of experience managing PostgreSQL, Microsoft SQL Server, MySQL, and Redis databases in production environments. Experienced in database administration, performance tuning, monitoring, troubleshooting, backup and recovery, and automation using SQL, Python, Ansible, and PowerShell. Focused on ensuring database reliability, availability, and operational efficiency for business-critical applications.

TECHNICAL SKILLS

Databases: PostgreSQL, MSSQL, MySQL, Redis

Programming: Python, SQL, Java

Automation: Python, Ansible

Monitoring: Grafana, Ipsentry

OS: Linux, Windows

Core Competencies:

Query Optimization • Performance Tuning • Monitoring • Automation

PROFESSIONAL EXPERIENCE

Casepoint Pvt Ltd | Database Administrator | Surat, India |

(Sep 2023 – Present)

- Manage production PostgreSQL, Microsoft SQL Server, MySQL, and Redis databases, ensuring high availability, reliability, and performance.
- Monitor database health and performance, analyze SQL queries, and implement performance tuning recommendations.
- Perform database health checks, server validations, and routine maintenance activities across production environments.
- Execute backup, restore, and disaster recovery procedures to ensure data protection and business continuity.
- Develop and maintain automation solutions using Python, Ansible, and PowerShell to streamline database administration tasks.
- Design and maintain Grafana dashboards for database and infrastructure monitoring.
- Participate in database migration and environment setup activities while ensuring data integrity and operational stability.
- Collaborate with cross-functional teams to troubleshoot database issues and improve system performance.

Key Contributions:-

Environment Setup & Migration (Casepoint–Opexus Integration)

- Contributed to Microsoft SQL Server environment setup and migration activities.
- Performed data validation and integrity checks before and after migration.
- Ensured successful migration execution with minimal operational impact.

Redis Upgrade Automation

- Automated Redis upgrade processes using Python, Ansible, and PowerShell, reducing manual effort by 70% and improving deployment consistency.
- Standardized upgrade procedures to minimize operational risks and improve efficiency.

Monitoring & Alerting

- Developed Grafana dashboards to monitor database and infrastructure performance.
- Implemented alerting mechanisms for proactive issue detection and faster resolution.

Automation & Operational Efficiency

- Built automation scripts using Python and PowerShell to reduce manual effort and improve operational efficiency.
- Standardized recurring administrative tasks through automation and process improvements.

KEY ACHIEVEMENTS

- Improved operational efficiency by automating database and data validation tasks using Python and Ansible
- Enhanced monitoring and alerting systems, enabling faster detection and resolution of performance issues
- Recognized with CP Excellence Award – **“The Hero with a Tie”** for ownership and reliability

CERTIFICATIONS

- PostgreSQL Database Administration — Udemy | [Credential Link](#)
- Complete Microsoft SQL Server Database Administration Course — Udemy | [Credential Link](#)
- SQL (Intermediate) Certificate— HackerRank | [Credential](#)

EDUCATION

Bachelor of Engineering (Information Technology)

Gujarat Technological University (2019 – 2023)

Higher Secondary (Science)

Vidhyamangal Residential School (2017 – 2019)

LANGUAGES

- English
- Hindi
- Gujarati

INTERESTS

Database Administration • Performance Optimization • Automation • High Availability • Database Technologies
